PROFESSIONAL SUMMARY

Computer Science student and Software Engineer with experience in quantum computing, distributed systems, cryptography, cybersecurity, and blockchain infrastructure. Currently conducting quantum computing research at Inteli in collaboration with IBM and Flex. Published researcher in AI security and awarded at international technology hackathons.

TECHNICAL SKILLS

Languages: Python, Rust, C++, TypeScript, JavaScript, Solidity
Quantum Computing: Qiskit, Monte Carlo, Randomization
Systems & Security: Distributed Systems, Cryptography, Cybersecurity, Linux
Blockchain: EVM, Smart Contracts, DeFi, Account Abstraction, Oracles
Tools: Git, REST APIs, Node.js, Foundry, Hardhat, Ethers.js, Viem

---

PROFESSIONAL EXPERIENCE

Inteli — Quantum Computing Researcher

September 2026 – Present

- Conducting quantum computing research in a project developed in collaboration with IBM and Flex.
- Working with Qiskit, Monte Carlo methods, and randomization.

Nexus — Blockchain Engineer

June 2026 – September 2026

- Contributed to core blockchain infrastructure using Rust, with focus on cryptography, security, and telemetry.
- Worked within the Core team on reliability and observability of distributed systems.

Picnic — Software Engineer

August 2025 – March 2026

- Developed Web3 applications across backend, frontend, and mobile systems.
- Worked with account abstraction and smart contract integrations using Ethers.js and Viem.

Panorama Block — Web3 Developer

April 2025 – August 2025

- Developed DeFi applications interacting directly with EVM-based smart contracts.
- Integrated on-chain logic with backend systems using TypeScript.

MB | Mercado Bitcoin — Blockchain Analyst

March 2025 – April 2025

- Analyzed privacy solutions for DREX, evaluating cryptographic approaches and architectural trade-offs.

DUX — Web3 Developer

October 2022 – October 2023

- Developed blockchain applications, smart contract integrations, and backend services.

PUBLICATION

AI, Fill This Form: A Simple and Effective Data Exfiltration Attack on LLM-Based Browser Extensions Without Prompt Injection

SBSeg 2026 — Brazilian Symposium on Cybersecurity
Workshop on Cybersecurity and Artificial Intelligence (WCIA)

Research on Ghost Field Exfiltration (GFE), a data exfiltration attack against LLM-based browser agents evaluated across 300 controlled experiments.

AWARDS

ETHBogotá Hackathon — Best Use of Chainlink Technology

Awarded for a blockchain application integrating smart contracts and oracle infrastructure.

ETHGlobal Lisbon — Best Infrastructure & Tooling on 0G

Built AEGIS, a security layer for AI-agent financial transactions that validates transaction policies and privately verifies user intent with 0G TeeML before execution through Safe.

EDUCATION

Inteli — Institute of Technology and Leadership

Bachelor’s Degree in Computer Science
January 2025 – December 2028

ACHIEVEMENTS

- Silver Medal — Jacob Palis Jr. Mathematical Olympiad
- Silver Medal — National Science Olympiad (ONC)
- Bronze Medal — Brazilian Astronomy Olympiad (OBA)
- Cryptography Specialist Certification
- Blockchain Engineer Certification
